

慢行交通國際論壇

慢行交通(Active Mobility)係指由使用者自行供給能源、以人性為考量、有益健康與社會福祉與兼具節省能源之運輸系統，運具包含自行車與步行。各國為打造宜居都市，健全公共運輸發展，對於第一哩和最後一哩的慢行交通之發展尤其重視。「慢行交通國際論壇」自 2013 年開始，臺大先進公共運輸中心連續三年透過國際合作邀請世界無車日創始人 Eric Britton 教授以及「歐洲自行車聯盟」(European Cyclists' Federation, ECF)、同時也是「世界自行車聯盟」(World Cycling Alliance, WCA) 理事長 Manfred Neun 先生來臺，與臺灣專家學者針對自行車和慢行交通之發展與研究課題進行交流。本次論壇首度邀請到美國 Alta Planning+Design, Inc.公司的總經理 George Hudson，將針對自行車與永續規劃之發展現況進行交流，期能透過此次論壇對於我國慢行交通之發展提出具體建言。

International Active Mobility Forum

Active Mobility includes cycling and pedestrian. It also means supplied by the user on their own energy, humanity design, both for health and social well-being and energy-saving transportation system. Many cities have provided the integration of public transport and active mobility that offered seamless transportation services for achieving a livable city. Active mobility is the best choice for the first mile and the last mile services in the whole transportation system. It is also the crucial part of urban mobility for aging society.

“International Active Mobility Forum” aims to make suggestions for improving active mobility in Taiwan through discussing our current development with invited speakers and guests. Since 2013, many international experts including Prof. Eric Britton, Founder of World Car Free Day as well as Mr. Manfred Neun and his team from European Cyclists' Federation have been invited to share their works on developing active mobility in Europe. This time, Mr. George Hudson, President of Alta Planning+Design, Inc. is invited to give us an insight into current development of planning, design and implementation on active mobility in the North America and will discuss important issues with local experts from both public sector and academic institutes.
